BLOOD CHEMISTRY FORM, 3 of 3

The CTCA requires a general, comprehensive blood panel and several additional serum panels to complete this portion of the CTCA Health Test. **The general, comprehensive blood panel should test for:**

Glucose	Urea Nitrogen	Creatine	Alkaline Phosphatase
Total Protein	Albumin	Bilirubin (total)	ALT (SGPT)
AST (SGOT)	Cholesterol	Calcium	Phosphorus
Sodium	Potassium	Chloride	A/G
Bun/Creatinine	Globulin	Hemoglobin	Hematocrit
WBC	RBC	MCV	MCH
MCHC	Platelet Est	Absolute Polys	Absolute Bands
Absolute Lymphs	Absolute Monos	Absolute EOS	Absolute Basos

We require the following additional panels/test:

- Brucellosis
- Clotting Time
- Bile Acids Test (arrange in advance with your veterinarian)

In your opinion, are there any symptoms exhibited by this dog that would suggest the need for additional tests? If so, please specify:

Please attach the lab results to this form. The results should clearly show the name of the dog and the date. If not visible, please write on the form and sign. **Please email these forms to crcotons@gmail.com.**

Thank you again!

TO THE APPLICANT: Any falsification of these tests may result in your immediate and permanent expulsion from the CTCA, the reclassification of your dogs or possibly the removal of your dogs and their progeny from the CTCA's database.
